File management with Chaos desktop

File management in *Chaos desktop* is a lot like file management in *File Explorer* but *Chaos desktop* have some more functions.
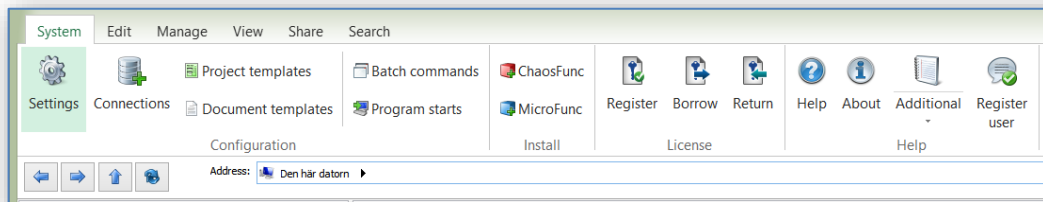

- ♦ **Copy files: CTRL+C and CTRL+V**

- ♦ **Move files: CTRL+X and CTRL+V**

- ♦ **Drag and drop: If you want to, you can deactivate drag and drop.**

- ♦ **Metadata: Every file in *Chaos desktop* have a metadata file that contains metadata about the file. The file is not visible in *Chaos desktop* but in *File Explorer* you can see it with the file extension .md. The .md file will automatically be updated when you use *Chaos desktop* for file management.**

Du behöver

x1   x1   x2   x1

♦ Deactivate drag and drop

Click **Settings** on the tab **System**.

On the tab **Local** uncheck the box **Enable drag and drop**.
This setting is personal and will not affect someone else in the project.
