Topocad

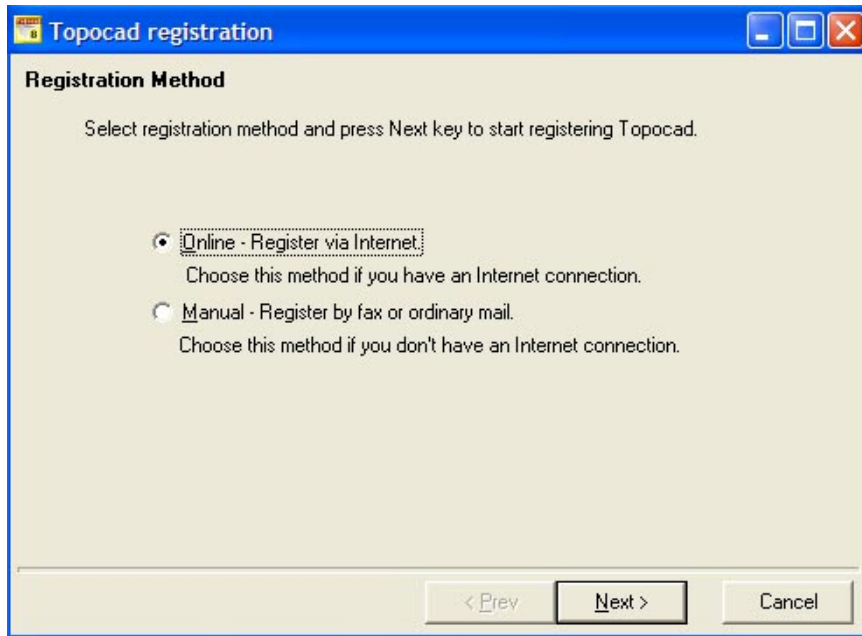

Topocad registration procedures

Topocad have two types of registrations, one is on-line and requires an Internet connection for a very small amount of data exchange, and the other is the manual registration.

The registration is either processed automatically the first time you start Topocad but can also be reached from within the software - at File|Register program.

Online registration

The online registration requires an Internet connection but it sends a very small amount of data, modem connection is ok. Select the online registration.

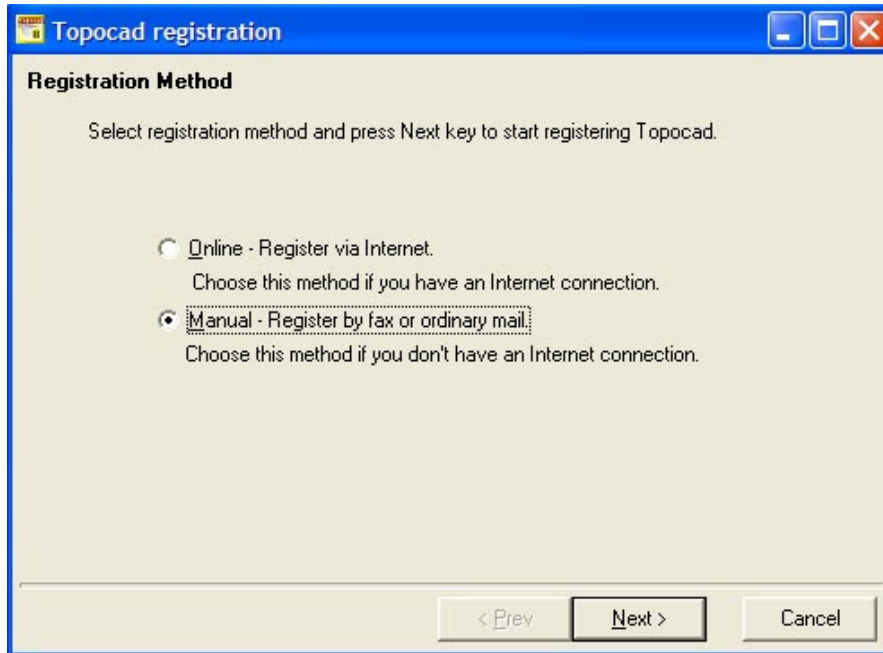

Type in your registration key.
Click Next, it will now take a few seconds and your registration is made.

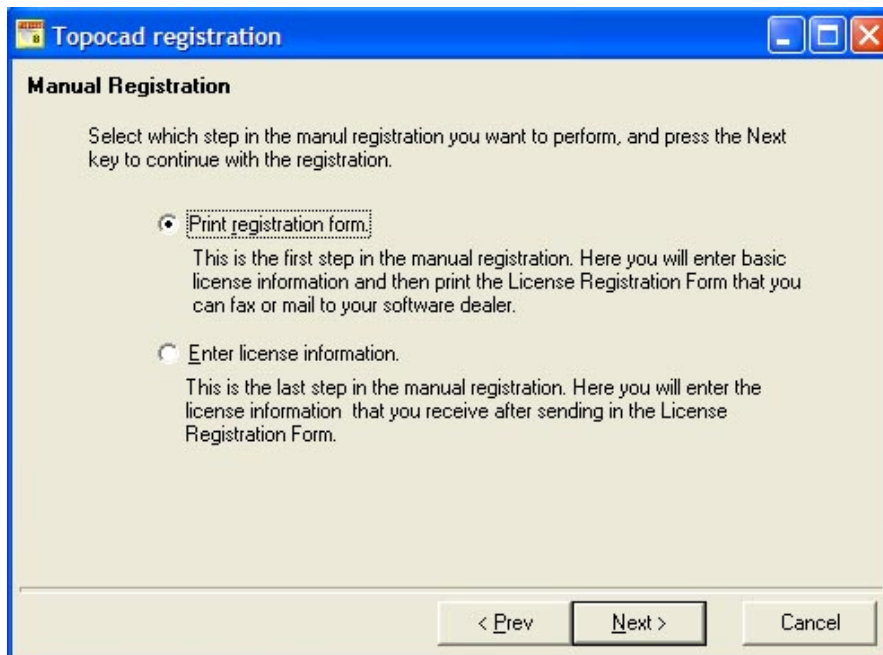

Manual registration

Step 1.

During the manual registration you fill in some data which creates a lock code. This lock code is used for create an authorization code (license information).

Select the manual registration

Start with "Print registration form"

Enter Registration Information 1 of 2

Enter your license number, user information and address, then press the Next button to continue.

License number: 1-234-5-6 *

Manual Registration

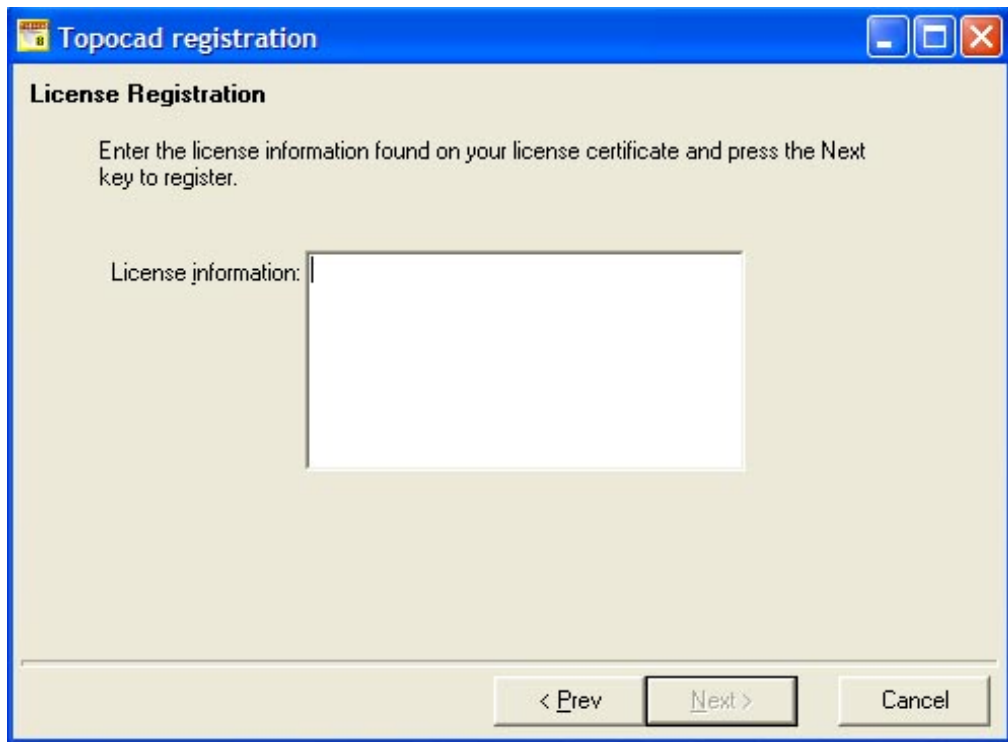

Select which step in the manual registration you want to perform, and press the Next key to continue with the registration.

Print registration form.
This is the first step in the manual registration. Here you will enter basic license information and then print the License Registration Form that you can fax or mail to your software dealer.

Enter license information.
This is the last step in the manual registration. Here you will enter the license information that you receive after sending in the License Registration Form.

< Prev Next > Cancel

Enter the license information (authorization code) in this field, with or without spaces. It is 64 digits.

Good luck! You are now up and running with your license!
